## **DETAILED ACTION**

### ***Priority***

Acknowledgement is made of papers filed claiming priority from U.S. Serial No. 09/936320 filed on September 12, 2001 under 37 CR 1.114, which itself claims priority from provisional patent application No. 60/ 124,299 filed on March 12, 1999.

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on April 26, 2006 and March 30, 2006 have been entered.

### ***Preliminary Amendment***

Applicants' amendment filed March 30, 2006 has been entered after the entry of the RCE on May 03, 2006.

Therefore claims 89-95 and 97-98 as amended by the amendment and claims 96, 124 as previously recited are currently pending in the Application.

Claims 1-88 and 125-129 were previously canceled.

### ***Information Disclosure Statement***

No further IDSs after the one filed on August 25, 2005 have been filed in this case.

### ***Allowable Subject Matter***

Claims 89-98 and 124 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim (1) , which include a layered structure for forming a Ge channel FETS including a single crystalline substrate , a first layer of relaxed Si Ge formed epitaxially on the substrate where the Ge fraction ranges from 0.5 to 0.8, a second Ge layer under compressive strain having a thickness 10nm to 15 nm and a third layer of SiGe or Si having a thickness of less than 1nm and a fourth layer of gate dielectric formed on the third layer. ( emphasis supplied) .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
